- Git

PROJECTS

Robert Orji

https://artrobd.netlify.app

A personal website built for Robert Orji, a digital artist using ReactJS.

Ezema Emmanuel

http://ezema.netlify.app

This is is best project till date, it was created using React. The Express backend was hosted locally. I applied some interesting visual ideas like the dynamic background.

Ridm

https://ridm.netlify.app

A music streaming clone app which utilizes the Deezer API. It was created using React, Tailwind, react-router etc. It was a really fun project because it gave improve my knowledge on APIs and how to use them.
